## We Want Your Produce

Did it ever occur to you that this firm pays just what we sell produce for? Stop and think about it for a second. The firm which pays more than the market price must get even some way and in the dicker with you for your produce they may pay a cent more but it is a cinch they CHARGE MORE FOR WHAT THEY SELL YOU.

The farmers of Clarke County who want the real market price—the top price, if you please, and an honorable and square deal will come to this place.

TO FIND THE RATE FOR A PACKAGE—Measure the distance in a straight line from the town from which the package is sent to the town to which it is to be sent. Measure the distance in a straight line from the town from which the package is sent to the town to which it is to be sent. Measure the distance in a straight line from the town from which the package is sent to the town to which it is to be sent.

EXAMPLE—To find the rate on a 4 lb. package sent from Cleveland, Ohio, to Houston, Texas. By laying a ruler on the map, the distance is found to be within the sixth Zone. For that Zone the first pound costs 9-cents, each additional pound 8-cents; the rate is 36-cents.

which the package is sent, to the town to which package goes. Then use the Rate Scale and standard inch rule on the map you will find that the distance is 8 1/2 inches. The above scale shows this number of inches to come therefore the rate for 4-lbs. is 33-cents.
